RESOLUTION
ROCK COUNTY BOARD OF SUPERVISORS

Board of Health

INITIATED BY

Marie-Noël Sandoval
DRAFTED BY

April 1, 2017
DATE DRAFTED

Resolution to Secure State Funding to Support Communicable Disease Control for Population Health

WHEREAS, Wisconsin has no dedicated, stable federal and state funding sources for communicable disease control and prevention efforts; and,

WHEREAS, a strong public health infrastructure is paramount to the health of all citizens; and,

WHEREAS, emerging and existing communicable diseases threaten health security, economies, and quality of life for all; and,

WHEREAS, communicable diseases such as Ebola, H1N1, measles, HIV and AIDS, tuberculosis, influenza, measles, syphilis, gonorrhea, rabies, hepatitis, polio, and pertussis, can threaten the lives and well-being of Wisconsin residents; and,

WHEREAS, emerging and re-emerging threats such as Ebola, H1N1, SARS, and measles threaten personal and community safety and require substantial resources to contain; and,

WHEREAS, blood borne pathogens that cause long-term disease such as Hepatitis C are occurring at unprecedented rates – rates that are accelerating as a result of the opiate epidemic; and,

WHEREAS, Wisconsin local health department communicable disease programs protect residents by investigating and controlling communicable diseases, collecting data, educating the community about prevention and the importance of immunizations, and caring for those affected by these diseases; and,

WHEREAS, public health departments have been successful in controlling communicable diseases through case reporting and involvement of public health staff in referral of exposed persons for screening and prevention services; and,

WHEREAS, evidence in the scientific literature indicates that partner notification services are not adequately assured in the absence of specific public health staff involvement; and,

WHEREAS, local health departments and the State of Wisconsin have demonstrated commitment, competence and success in insuring the confidentiality of persons with reported communicable disease for decades, including cases of AIDS; and,

WHEREAS, local health departments have placed a high priority on communicable disease control; and,

WHEREAS, communicable disease control is one of the ten essential functions of public health.

NOW, THEREFORE, BE IT RESOLVED that the Rock County Board of Supervisors duly assembled this 13th day of April, 2017 urges the state legislature to develop and enact bipartisan support for funding of comprehensive, sustainable, effective and evidence based communicable disease control and prevention for the public’s health.

BE IT FURTHER RESOLVED that a copy of this resolution be sent to Governor Scott Walker, Rock County legislative delegation, the Wisconsin Counties Association, the Wisconsin Association of Local Health Departments and Boards, as well as the Wisconsin Public Health Association.
Resolution to Secure State Funding to Support Communicable Disease Control for Population Health

Respectfully submitted,

**BOARD OF HEALTH**

Sandy Kraft, Chair  
Louis Peer, Vice Chair  
Richard Bostwick  
Linda Garrett

Keith Konkol, MD

Dr. Keith Konkol, MD

Dr. Connie Winter, DDS

Judith Wade

Eric Greens

**COUNTY BOARD STAFF COMMITTEE**

J. Russell Podzilni, Chair  
Sandra Kraft, Vice Chair  
Betty Jo Bussie  
Eva Arnold

Mary Machinney

Alan Sweeney

Henry Brill  
Louis Peer

Terry Thomas

**FISCAL NOTE:**  
This resolution is advisory only and has no direct fiscal impact on Rock County operations in and by itself.

Sherry Oja  
Finance Director

**LEGAL NOTE:**  
Advisory Only

Jeffrey S. Kuglitsch  
Corporation Counsel

**ADMINISTRATIVE NOTE:**  
The Wisconsin Counties Association 2017-2018 Legislative Agenda includes a request for additional state funding to County health departments to control and prevent communicable disease.

Josh Smith  
County Administrator
Executive Summary

Wisconsin’s Local Health Departments (LHDs) are as varied in size and composition as the populations of the jurisdictions they serve. However, all these LHDs share a common mission of protecting and improving community well-being. This is accomplished by preventing disease, illness, and injury and by impacting social, economic, and environmental factors fundamental to excellent health.

Communicable disease control is one of the ten essential public health functions. Unfortunately the ability of local public health departments to perform this core functions has been drastically limited by lack of funding. A significant number of communicable diseases exist within communities, but health departments rarely have sufficient staff time and expertise to support effective diseases prevention efforts. Today’s system for financing public health in Wisconsin has several noteworthy aspects:

- No dedicated, stable state and federal funding for communicable disease control and prevention
- Inadequate Public Health and CDC funding per capita
- Declining local level funding due to budget levy limits
- Emerging and re-emerging health threats
- Reliance on categorical/silo funds
- Increasing reliance on fees
- Local funding disparities between agencies

In a comparison of state budgets and appropriations for the agency in charge of public health services, Trust for America’s Health (TFAH) has consistently found that Wisconsin has ranked 46th – 49th out of 51 in state funding for public health. Wisconsin ranked 43rd – 46th in CDC funding per capita. There has been some progress in moving funding levels toward the median however we are still at the bottom of the rankings and need to continue to make public health funding a priority.

In the April 2012 report For the Public's Health: Investing in a Healthier Future, the Institute of Medicine (IOM) identified “essential ingredients” to renew the public health system:

- Adequate and sustainable funding for governmental public health;
- Reform of governmental public health infrastructure and operations to align spending with need; and
- Using public health knowledge to help improve delivery and quality of clinical care and integrate it with public health’s population-based efforts.

Supporting a strong public health infrastructure is paramount with the continuing occurrences of natural disasters, terrorist attacks, and infectious diseases like tuberculosis, Ebola, whooping cough and flu.
