

- RECOGNIZING CLIMATE CHANGE AND URGING CONGRESS TO LEVY A REVENUE- NEUTRAL FEE ON CARBON IN FOSSIL FUELS -

WHEREAS, climate scientists worldwide are in near-unanimous agreement that the Earth is warming rapidly which is causing changes in climate that are perilous to the Earth's natural systems and to human civilization; and

WHEREAS, the primary cause of that warming is human activity, especially through the combustion of fossil fuels which emit greenhouse gases such as carbon dioxide (CO₂); and

WHEREAS, the continued use of fossil fuels is being supported by a market failure whereby the costs of carbon emissions are not included in the price of fossil fuels; and

WHEREAS, the urgent need to transition away from fossil fuels can best be accomplished with a market-based program, namely a revenue-neutral carbon fee on fossil fuel producers with a corresponding rebate or dividend to consumers; and

WHEREAS, using a revenue-neutral carbon fee and dividend to reduce carbon emissions would have the following benefits:

- The carbon fee would incentivize the development and use of energy efficiency and low carbon energy sources and minimize the need for onerous governmental energy regulations and subsidies that attempt to forecast winners and losers.
- The transition to low-carbon energy sources will provide a range of additional benefits including enhanced public health, job creation and strengthening of the U.S. economy, increased energy security, and increased local energy development in rural areas.
- Even though the carbon fee would temporarily increase energy costs including electric rates, and the cost of living, those costs would be offset by the revenue returned to households on an equal basis as a dividend such that the bottom 55-60% of households by income would break even or receive more in dividends than they would pay in higher living expenses.

NOW THEREFORE BE IT RESOLVED, by the Eau Claire County Board of Supervisors that the county board strongly urges the United States Congress to pass legislation that levies an annually increasing revenue-neutral fee on the carbon in fossil fuels at the point of production or importation, that would be sufficient to:

- Encourage individuals and businesses to produce and use less fossil fuels;
- Make the transition from fossil fuels less onerous to consumers and to the economy by returning to Americans on an equal basis all of the revenues gained from the fee;
- Reduce U.S. CO₂ emissions to 10% of 1990 levels by 2050;
- Encourage similar actions by other nations trading with the United States, by suitable carbon-content-based fees for imports, and rebates for exports, to nations that have not taken such actions.

BE IT FURTHER RESOLVED that the County Clerk is directed to send a copy of this

resolution to the Governor of the State of Wisconsin, assembly members and senators representing Eau Claire County, Senator Ron Johnson, Senator Tammy Baldwin, Representative Ron Kind and the Wisconsin Counties Association.

ADOPTED: June 19, 2018

Janet K. Loomis
County Clerk
