1. Describe how this project or good/service addresses a negative impact due to the Covid pandemic and provide the reasoning/research behind your determination. If needed, please include the page number on the U.S. Treasury Interim Final Rule that states this is an eligible expense.

The Sawyer County Jail is approved by the Department of Corrections for the detention of adult offenders. There have been operational strains in 2020 and 2021 due to the COVID-19 pandemic. The issues have been assessed and addressed in a highly professional manner. To continue our effort for the safety and security of jail staff and inmates from the contagious disease, incorporating a Whole-Body Thermal Security Scanner will greatly improve the initial screening of newly incarcerated inmates for the detection of COVID-19. If the inmate body temperature is higher than normal the inmate can be placed in medical isolation pending the results of a COVID-19 test. It will also allow jail staff to maintain proper social distancing from inmates who have not been tested for COVID-19.

2. If this purchase is for a project to address a negative impact due to the Covid pandemic, please include staff that may be administering and managing the project as well as a breakdown of expenses. If needed, please attach a supplemental excel/word file.

The Whole-Body Thermal Security Scanner will be operated by on-duty jail staff upon completion of training. Please see attached price quote from Tek84 for a breakdown in cost. The Tek84 Whole-Body Thermal Security Scanner is the most cost-effective and widely used Whole-Body Thermal Security Scanner in the State of Wisconsin. It also has a minimal footprint, which will allow us to have it installed without needing any modification to the structure of the Sawyer County Jail.
